

ACGT Payment Options

The following briefly describes acceptable means of payment for all Sanger sequencing and NGS services offered through your online account. Please note that the means of payment listed below may not be acceptable for ACGT custom projects. Should you have any questions please contact us at billing@acgtinc.com.

Purchase Orders

A Purchase Order (P.O.) is a unique number issued by an end user's purchasing department or authorized purchasing personnel. If you intend on selecting this option, you must obtain a P.O. number prior to submitting an order through your account. A quote for our services may be required prior to the release of a P.O. depending on the policies of your company or institution. If this is needed, please submit a quote request through our website (the orange button in the top right corner).

Credit Card

ACGT accepts all major credit cards for payment of Sanger sequencing and NGS services.

ACGT Card

The ACGT Card is a pre-paid option. You may purchase or reload your balance through your online account. We only accept credit card payments to fund the ACGT Card. You must verify that your company or institution's policies permit its purchase and use, as this pre-paid card cannot be redeemed for cash. The ACGT Card cannot be combined with other forms of payment to transact a single order. This card does not expire. For a complete list of our terms and conditions please visit our website.

Purchasing Agent

In some cases, end users are not authorized to approve payment for the order they submitted. By selecting the Purchasing Agent option, the account holder is automatically sent an email containing a link to a confirmation page and a passcode in which their purchasing agent can enter credit card or P.O. information and approve the order.

Please note: By selecting this option, ACGT will not process your order or upload data until the order has been approved and payment information provided.
